

# PROMOTE WR

## Growth enhancer for trees and shrubs.

### PLANT GROWTH REGULATOR – WATER RESISTANT PASTE

Registration Number 2020CA114 Fertilizer Act  
Lot Number:  
Expiry date:

Director - Crop Inputs Division  
Directeur - Division d'intrants des cultures  
Plant Health & Biosecurity Directorate  
Direction de la protection et biosécurité des végétaux

Guaranteed Minimum Analysis: Gibberellic Acid (GA3).....1%  
6-Benzyladenine (6BA).....1%

AUG 19 2020

Net contents: 1g GA3 1g 6BA/100g PROMOTE WR  
Net Weight: 240g  
Container Size: 240g

**Effect:** Promotes growth of stem and branches. Promotes branching and feathering. Diligent use can increase the size, number of branches and feathering of the tree or shrub in a short period of time.

**Recommended:** For growers and wholesalers. Application of PROMOTE WR as a concentrated waterproof paste can rapidly increase growth of trees and shrubs and enable the grower to bring the trees to market earlier. Promotion of branching and feathering of the tree can also benefit the fruit grower as it can accelerate the maturity of the tree and enable it to produce fruit much earlier.

**Application:**

- Apply as a band immediately below the Apical Meristem to promote growth and feathering
- Apply to a cut in the main stem to promote branching
- Re-seal container when not in use and store in a cool, dry area.

**Instructions for use:**

- Apply 0.25-0.5 mL of the paste in early spring once the Apical bud starts to develop and every 4 weeks until feathering or branching is observed.
- Once feathering or branching is observed, we recommend using Grospurt Treehance™ to promote accelerated linear growth as directed.

Precautions: Keep out of the reach of children. Do not get into eyes or on skin. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Use personal protective equipment (PPE), gloves and goggles to protect skin and eyes from contact.
